CONTENTS

Volume 79, Number 1, 1994

A. S. Solodovnikov, Global structure of semireducible Riemannian spaces of class C^∞	1
S. M. Natanzon, Topological invariants and moduli of hyperbolic $N = 2$ Riemann supersurfaces	15
V. V. Zharinov, On spectral sequences of evolution systems with constraints	33
V. V. Goryainov, Fractional iteration of probability generating functions and imbedding discrete branching processes in continuous processes	47
A. B. Shidlovskii, Transcendence of the values of E -functions that are solutions of second order linear differential equations	63
A. V. Lëtkhikov, A criterion for linear drift, and the central limit theorem for one-dimensional random walks in a random environment	73
V. L. Dol'nikov, Transversals of families of sets in \mathbb{R}^n and a connection between the Helly and Borsuk theorems	93
A. V. Komarov, Operators in a topological module of entire functions commuting with differentiation on a submodule	109
A. V. Arutyunov, S. M. Aseev, and V. I. Blagodat-skikh, First-order necessary conditions in the problem of optimal control of a differential inclusion with phase constraints	117
R. V. Guseinov, On anisotropic Hardy inequalities and their applications	141
Ya. Sh. Il'yasov, On the existence of periodic solutions of semilinear elliptic equations	167
S. A. Stepin, Spectrum and completeness of natural oscillations of the atmosphere with temperature stratification	179
G. A. Chechkin, Averaging of boundary value problems with a singular perturbation of the boundary conditions	191
V. I. Zenkov, A uniqueness theorem and intersections of nilpotent subgroups in finite groups	223

Volume 79, Number 2, 1994

N. I. Dubrovin, Rational closures of group rings of left-ordered groups ..	231
V. E. Maiorov, Kolmogorov's (n, δ) -widths of spaces of smooth functions ..	265
V. V. Volchkov, New theorems on the mean for solutions of the Helmholtz equation	281

I. G. Tsar'kov , On global existence of an implicit function	287
E. A. Kalita , On singular points of solutions of nonlinear higher-order elliptic equations and systems	315
S. I. Pokhozhaev , Sharp a priori estimates for a quasilinear degenerate elliptic problem	335
V. A. Volevich , Construction of an analogue of Bowen-Ruelle-Sinai measure for a multidimensional lattice of interacting hyperbolic mappings	347
V. S. Klimov , Evolution parabolic inequalities with multivalued operators	365
I. Yu. Maslyakov , Strictly sharp irreducible characters of symmetric and alternating groups	381
A. S. Krivosheev , On indicators of entire functions and extension of solutions of a homogeneous convolution equation	401
F. A. Shamoyan , Closed ideals in algebras of functions analytic in the disk and smooth up to its boundary	425
O. E. Arsen'eva , Selfdual geometry of generalized Kählerian manifolds ..	447
R. Ts. Musaelyan , The existence of infinite polygons in a two-dimensional metric of variable negative curvature	459
